Cover		CVR-9MA8RBP-T-KH,RS,TO,HG,GS,BR

This ATLeisure product is covered by U.S. Patent No. 7,533,679 and U.S. Patent No. 7,60,401,5.

**90-DAY WARRANTY**  
This product is covered under a manufacturer’s 90-day warranty from date of purchase against defects in materials and workmanship. This warranty does not cover damage due to neglect, abuse or weather related damage. For full warranty disclosure, email us at **customerservice@atleisure.com**.

## 6. Warnings |

1. Do not use this umbrella during periods of high wind and rain. Failure to do so may result in personal injury and/or property damage.
2. Always take the umbrella down when not in use.
3. Placement of the umbrella over or near a swimming pool can cause premature fading of the canopy. This is not covered under our warranty.
4. To prevent damage to the canopy, open the umbrella facing the opposite direction that the wind is blowing.

### CANOPY CARE INSTRUCTIONS:

Simply clean the umbrella canopy with a soft brush and mild detergent.

Do not machine wash.

Do not iron.

Air dry the canopy thoroughly before storing for extended periods of time.

Make sure the canopy is completely open during drying process to prevent shrinkage.

### BATTERY DISPOSAL INSTRUCTIONS

1. For best results, use AA size Ni-MH 1200mAh (minimum) (1300mAh are supplied with panel) rechargeable batteries.
2. Install only new batteries of the same type in your product.
3. Failure to insert batteries in the correct polarity, as indicated in the battery compartment, may shorten the life of the batteries or cause batteries to leak.
4. Do not mix old and new batteries.
5. Do not mix Alkaline, Standard (Carbon-Zinc) or Rechargeable (Nickel Cadmium) or (Nickel Metal Hydride) batteries.
6. Do not dispose of batteries in fire.
7. Batteries should be recycled or disposed of as per state and local guidelines.

## | Instructions Of Set-Up & Operation 3.

Before beginning assembly of product, make sure all parts are present. Compare parts with package contents list. If any part is missing or damaged, contact our customer service toll free at **1-855-880-7205** for replacement parts or further instructions.

Fig. 1

**Step 1.** Insert the plug into the socket under the solar panel as shown in Fig. 1.

Fig. 2

**Step 2.** Put the solar panel on the top of umbrella and hide the plug and wire inside the groove at the top of umbrella. Then turn the solar panel clockwise. Do not over tighten. Please remove the plastic film on the solar panel. This protective plastic film is to prevent damage during shipment.

Fig. 3

**Step 3.** To assemble the two pole pieces together: Insert the bottom pole into the upper pole while pressing the snap button on the bottom pole until the snap button locks into position as shown in Fig. 3.

Fig. 4

**Step 4.** We recommend that you stand and secure the umbrella to an umbrella base (not included).

## 4. Instructions Of Set-Up & Operation (cont'd) |

Fig. 5

**Step 5.** Put the solar umbrella in the sunlight to charge the batteries before the first use as shown in Fig. 5.

**Make sure to charge the batteries for at least 8 hours before the first use. Otherwise it will shorten lifespan of the batteries and decrease performance. If charging the solar panel while attached to the umbrella, make sure the switch on the pole is in the off position.**

Fig. 6

**Step 6.** Turn the crank handle in the clockwise direction to open the umbrella canopy, in the opposite direction to close the canopy. To close the umbrella it must be in the upright position. Turn the crank handle in the clockwise direction and it will automatically tilt the umbrella to an angle. It will automatically come back to original position if turning the crank handle in the counterclockwise direction. Press the light switch to turn on/off the solar lights.

Reverse the set-up steps above to take down the umbrella.

**You must charge batteries before first use.**

Please note that batteries can discharge if they are left unused or uncharged for a long period of time. Since there can be a six-month period between production and final customer purchase, we recommend you charge your solar umbrella for at least 8 hours in direct sunlight before the first use. Failure to charge the batteries will result in premature dimming of the lights in your new solar umbrella. Make sure the light switch is in the off position when charging the solar panel.

For everyday normal use, turn on the light switch in the night-time when you want to use solar light and turn off the switch after use. And make sure the light switch is in the off position in the daytime for the solar panel to recharge the batteries.

Please remove the plastic film on all solar panels, hubs, and lights as this protective coating is to prevent damage in shipping.

## | How to Replace the Batteries 5.

We recommend that you change the batteries in your solar light umbrella every year or when you feel the light output is diminished. Buy three (3) AA size Ni-MH 1200mAh (minimum) (1300mAh are supplied with panel) rechargeable batteries from any major retailer.

Tools required: Phillips head screw driver (not included)

Fig. 7

**Step 1.** Twist counterclockwise and remove the solar panel from the top of the umbrella as shown in Fig. 7.

Fig. 8

**Step 2.** Pull the plug out of the socket under the solar panel. Pull by holding the plug, not by pulling on the wires.

Fig. 9

**Step 3.** Put the solar panel upside down on a flat, non-abrasive surface to avoid scratching. Loosen all four (4) screws on the solar panel bottom case as shown in Fig. 9.

Fig. 10

**Step 4.** Carefully open the bottom case and set aside. Replace the batteries, matching the +/- on the batteries with the +/- on the battery case as shown in Fig. 10.

Fig. 11

**Step 5.** Carefully put the bottom case back. Align the screw holes and replace the screws. Do not over tighten the screws as shown in Fig. 11.

Your solar umbrella is ready to use again!

For everyday normal use, turn on the light switch in the night-time when you want to use solar light and turn off the switch after use. And make sure the light switch is in the off position in the daytime for the solar panel to recharge the batteries.
